HMK® P307 is a ready to use polishing wax that refreshes worn, scratched and dulled surfaces and enriches the color and structure of soft and hard natural stones, agglomerates, terrazzo etc. HMK® P307 gives the surface a brilliant shine and reduces the penetration of water and dirt. For interior use only. Do not use in wet areas such as shower cabins.

**Instructions:** If under floor heating exists, switch it off and allow the surface to cool. Clean the area to be treated thoroughly and allow it to dry (max. 2-4% moisture). Once fully dry (about 20-30 min.) buff the matte film either by hand with a soft cloth or by using a buffing machine with a lambswool bonnet. Repeat the process for very absorbent materials or to increase the effectiveness of the shine.
